

REMARKS

Claims 11 to 17 are pending.

Applicant respectfully requests reconsideration of the present application in view of this response.

Applicant thanks the Examiner for allowing claims 11 to 17.

The Specification was objected to for not providing proper antecedent basis for the claimed subject matter "partial spectral regions." Accordingly, Applicant submits above an amendment to the Specification of record to correct this informality. The amendment is supported by Applicant's original-filed abstract and claims. No new matter has been added. Accordingly, Applicant respectfully submits that the amendment cures any lack of antecedent basis; and, respectfully requests withdrawal of the objection to the Specification.

CONCLUSION

In view of the above, it is believed that any objection or rejection to the Specification has been overcome, and withdrawal of such objection or rejection is respectfully requested. And, Applicant respectfully requests that the present application having claims 11 to 17 be allowed as early as possible.

Respectfully submitted,
